How To Look Great In Photos!

Jung Lee, owner of N.Y.C. event planning and design firm Fête, shares her simple tips

Check yourself in a mirror first

"Make sure your hair has volume but isn't covering your face. Bring blotting papers to combat shine."

Find your best light "Natural light is great, but if you're outside, make sure you're not in a shaded spot. If you're inside, avoid fluorescents and head for soft light!"

Put down your drink "If you can't, don't try to hide it—it'll just look awkward."

Strike a flattering pose

"Stand at a slight angle with one foot in front of the other. Put a hand on your hip to define your shape and slim your arms. Then suck in a bit and look up!"

Smile—naturally! "Try to relax! Don't feel like you have to smile from ear to ear. And wait until the photographer is ready so it doesn't look forced."

EASY BEAUTY IDEAS!

FOR DAYTIME!

Stay fresh and pretty!

A light pink lip and defined yet soft eyes look gorgeous with a simple blowout. Slip on a headband to take things up a notch!

FOR EVENING!

Go sophisticated!

A sleek style like an updo adds polish—just keep it unfussy so it won't look overdone. Try black eye liner and a bright lip color for a bold finish.
